# SERVICE ANNOUNCEMENTS.

WASHINGTON, D. C., AUGUST 15, 1908.

---

[This publication is designed to disseminate information and instructions to persons in the service of the Bureau of Animal Industry. It is not intended for the public, and employees are cautioned against giving or showing copies to outsiders. A supply will be sent to each official in charge of a station or branch of the service, who should promptly distribute copies to all members of his force. A file should be kept at each station for reference.]

## INSTRUCTIONS CONCERNING MEAT INSPECTION.

## Reprocessing of Defective or Leaking Cans.

Section 2 of Regulation 23, B. A. I. Order 150, directs that "defective or leaking cans discovered after the process of sterilization has been completed shall not be repaired or repacked (unless such repairing is done within six hours of the time of original sterilization), but the contents of such cans shall be removed and condemned." In view of the fact that cans can not be satisfactorily inspected until they are chilled, and as several hours are required in many cases for chilling, the sterilization will be regarded as complete as soon as the cans have been chilled. Inspectors will therefore count the six hours allowed after sterilization from the time the cans are chilled sufficiently to allow proper handling. This will make it possible to detect and reprocess all of the leakers within the required time except those which develop during an afternoon run. In the case of leakers developed during an afternoon run, packers may be allowed to hold these cans in properly chilled coolers at a temperature not higher than 34° F. until the following day, when they may be reprocessed.

## SUBSTANCES PERMITTED FOR OFFICIAL DIPPING.

## Sheep and Cattle.

The use of the following-named substances is permitted by the Department in the official dipping of sheep and cattle for scabies under the terms of B. A. I. Order 143 and amendments:

"*Lilly's Lime-and-Sulphur Solution*," a lime-and-sulphur dip, manufactured by the Charles H. Lilly Company, Seattle, Wash. Dilution permitted, 1 gallon of Lilly's Lime-and-Sulphur Solution to not more than 13 $\frac{3}{4}$  gallons of water.

"*Snow's Concentrated Lime-and-Sulphur Solution*," a lime-and-sulphur dip, manufactured by the Agricultural Remedy Company, Topeka, Kans. Dilution permitted, 1 gallon of Snow's Concentrated Lime-and-Sulphur Solution to not more than 13 $\frac{1}{2}$  gallons of water.

## Sheep.

The use of the following-named substances is permitted by the Department in the official dipping of sheep for scabies under the terms of B. A. I. Order 143 and amendments:

"*Car-Sul Dip*," a coal-tar creosote dip, manufactured by the Moore Chemical and Manufacturing Company, Kansas City, Mo. Dilution permitted, 1 gallon of Car-Sul Dip to not more than 75 gallons of water.

"*Clover Brand Stock Dip*," a coal-tar creosote dip, manufactured for the Stock Food Company of America, Minneapolis, Minn. Dilution permitted, 1 gallon of Clover Brand Stock Dip to not more than 69 gallons of water.

"*Eagle Brand Live-Stock Dip and Disinfectant*," a coal-tar creosote dip, manufactured by Minter Bros. Manufacturing Company, Kansas City, Mo. Dilution permitted, 1 gallon of Eagle Brand Live-Stock Dip and Disinfectant to not more than 59 gallons of water.

"*Eureka Dip and Disinfectant*," a coal-tar creosote dip, manufactured for the Shrader Drug Company, Iowa City, Iowa. Dilution permitted, 1 gallon of Eureka Dip and Disinfectant to not more than 50 gallons of water. This dip should not be confused with Eureka Stock Dip, manufactured for the George H. Moore Supply Company, Kansas City, Mo., the use of which dip was authorized in Service Announcements of July 15, 1908, page 73. Only those packages which are labeled Eureka Stock Dip may be diluted in the proportion of 1 gallon to 70 gallons of water. Packages labeled Eureka Dip and Disinfectant should be used only in the proportion of 1 gallon to 50 gallons of water.

"*Hawkeye Dip*," a coal-tar creosote dip, manufactured for the Churchill Drug Company, Burlington, Iowa. Dilution permitted, 1 gallon of Hawkeye Dip to not more than 58 gallons of water.

"*Karbo Dip*," a coal-tar creosote dip, manufactured by J. W. Barwell, Waukegan, Ill. Dilution permitted, 1 gallon of Karbo Dip to not more than 59 gallons of water. This dip should not be confused with Karbo Dip No. 1, the use of which was authorized in Service Announcements of September 16, 1907, page 7. Only those packages which are labeled Karbo Dip may be diluted in the proportion of 1 gallon to not more than 59 gallons of water. Packages labeled Karbo Dip No. 1 should be used only in the proportion of 1 gallon to not more than 26 gallons of water.

"*Montana Stock Dip*," a coal-tar creosote dip, manufactured for the Montana Stock Dip Company, Miles City, Mont. Dilution permitted, 1 gallon of Montana Stock Dip to not more than 50 gallons of water.

"*Peerless Dip*," a coal-tar creosote dip, manufactured by the Peerless Stock Powder Company (Incorporated), Falls City, Nebr. Dilution permitted, 1 gallon of Peerless Dip to not more than 70 gallons of water. Owing to the high percentage of acid it will not be permissible under the regulations to dilute this dip for the dipping of sheep for scabies in a lower proportion than 1 gallon to 59 gallons of water.

"*Caldwell Cresol Dip*," a cresol dip, manufactured by the American Laboratories, Chicago, Ill. Dilution permitted, 1 gallon of Caldwell Cresol Dip to not more than 139 gallons of water.

"*Century Cresol Dip*," a cresol dip, manufactured by the American Laboratories, Chicago, Ill. Dilution permitted, 1 gallon of Century Cresol Dip to not more than 101 gallons of water.

"*Trinol*," a cresol dip, manufactured by the Gold Coin Chemical Works, St. Paul, Minn. Dilution permitted, 1 gallon of Trinol to not more than 115 gallons of water.

Inspectors will not permit the use in official dipping of packages of these dips which are not labeled in accordance with the above specifications, nor will they permit the use in official dipping of any proprietary dip which does not bear the guaranty required of manufacturers by the regulations, B. A. I. Order 143 and amendments thereto, or which in any manner violates the provisions of said regulations or amendments.

#### Change in Name of Manufacturer.

"*Carsolium Dip*."—The name of the manufacturer of this dip, the use of which in the official dipping of sheep for scabies was authorized in Service Announcements of August 15, 1907, page 12, has been changed from Iowa Hog and Cattle Powder Company to Paxton-Eckman Chemical Company, and the latter name will in future be shown on the label.

#### PREPARATION OF ACCOUNTS.

In rendering an account under a letter of authorization covering expenses chargeable to more than one appropriation the particular paragraph under which the expense is incurred should be indicated, as "246a" or "246b." If one account contains items chargeable to different appropriations the various items under each appropriation should be grouped together and the proper paragraph of the authorization indicated above each group.

A notation should be made on each travel account so as to show the character of the work for which the travel was performed. This information will not be required where the travel is merely a transfer from one station to another.

"Form A" vouchers for direct settlement of rent and telephone accounts should be stated in the following manner:

*Rent vouchers:* "Rent of room 323 Munsey Building, Washington, D. C., July 1 to July 31, 1908, used as local office of the Bureau of Animal Industry, at \$30 per month."

*Telephone vouchers:* "Rent of telephone M 2304, room 323 Munsey Building, Washington, D. C., July 1 to July 31, 1908, at \$5 per month."

The "method of competition" for leased rooms should be left blank, and for "character of agreement" the letter A should be inserted. In vouchers for telephone service the character of agreement should be stated as 4C.

Employees traveling on transportation requests should invariably submit a Form 4 voucher, whether other expenses are incurred or not, giving the required data under head of "Memorandum of travel performed upon transportation requests and mileage books" on the last page of the voucher. Such voucher should not be sworn to. Inspectors in charge should see that employees under their supervision comply with this requirement.

### BUREAU STATION LIBRARIES.

A few years ago libraries of Bureau publications for the use of employees were installed at some of the larger stations. The inspectors in charge at these stations should keep these libraries up to date by adding to them from time to time copies of publications received which are likely to be of interest and assistance to employees in their work, especially the annual reports. In case any such publications issued during the last few years are lacking, these will be supplied so far as practicable on request. As a rule, however, it is impossible to supply the earlier publications. Station libraries should be supervised so as to guard against loss, and employees should not be permitted to take out publications without having them charged in some way so that they can be located if not promptly returned.

### BULLETIN 97 ON TICK ERADICATION.

The Bureau has on hand a supply of Bulletin 97, "Proceedings of a Conference of Federal and State Representatives to Consider Plans for the Eradication of the Cattle Tick, held at Nashville, Tenn., December 5 and 6, 1906," which will be sent on request, so long as available, to Bureau officers in charge of tick eradication for distribution to employees under their direction and to State and county officers or other persons who are cooperating in that work. This bulletin, however, is not available for general free distribution to the public.

---

### PUBLICATIONS IN JULY.

[Publications intended for employees are sent in bulk to inspectors in charge at the different stations, and no mailing list of individual employees is kept. Owing to the limited editions and the large number of Bureau employees, as a rule only sufficient copies are sent to supply the veterinarians. Inspectors in charge will therefore see that the veterinary inspectors are first supplied, and if more copies are received than are necessary for this purpose the excess may be distributed to others. Requests from employees for publications will be complied with as far as practicable. Regulations will be supplied to inspectors in charge as freely as may be required for official use.]
